 of solutions for today’s
 eBusinesses.*

*LightBound’s voice and
 data solutions help
 businesses increase their
 productivity and profitability.*

Dedicated Internet Access

LightBound leased line service provides your organization dedicated point-to-point circuits to connect directly to the Internet.

Scalable

In the event your infrastructure needs to grow, LightBound is ready to follow your lead. Dedicated Internet Access (DIA) starts as low as a T1 Circuit – 1.5Mbps.

Need something bigger? We provide services to some of the largest fortune 500 Companies in Indiana. Services include Burstable DS3 - 45Mbps, OC3 -155Mbs, Gigabit Ethernet and private fiber connectivity.

Powerful

Our private peering relationships provide multiple routing paths for continuous, uninterrupted transport of your data with fewer hops and low latency, which means fewer delays.

Our fully redundant networks, two 2.5 GB connection to Chicago, IL and Ashburn, VA, coupled with BGP routing, instantly reroutes traffic to the best possible path providing always on and shortest path connectivity.

If you use the Internet for anything, downloading music or software, check the headlines, book a flight - you’ve probably used Akamai’s services without even knowing it. They play a critical role in getting content from providers to consumers. Today Akamai handles

tens of billions of daily Web interactions for companies like Audi, NBC, and Fujiitsu, and organizations like the U.S. Department of Defense and NASDAQ -- powering brand new business models that serve the changing online economy. LightBound houses Akamai servers in our data-center providing all these critical services and benefits to all of our customers.

24 x 7 x 365 Support

LightBound meets the performance and redundancy requirements of the most demanding customers by providing Operational support 24 hours a day, 7 days a week, everyday of the year.

Our trained and experienced technicians are here to help with router configurations, DNS (domain name service) entries, or any other need associated with your Internet service.

Support is available by phone or Email and is included with all Dedicated Internet Access services.
