

Voice Services

LightBound provides a comprehensive range of solutions for today's eBusinesses. LightBound's voice and data solutions help businesses increase their productivity and profitability.

LightBound IP Converge - Voice and Internet through a single circuit

Whether your need is traditional TDM PRIs, POTs, or simply want to take advantage of new technologies such as SIP, LightBound has the ability to provide voice services along Internet service over a single circuit to meet your needs. Connections are available in T1 and Ethernet from 10MB to 1GB.

VoIP PBX Solutions Hosted & CPE

LightBound offers a hosted and on premise VoIP PBX which can add features and functionality you would expect to find in large expensive systems. LightBound PBX along with our voice service can be a one stop shop for all your business communication needs

Conference Bridge

Dedicated voice conference bridge services can be set up for up to 20 users can be set up for local or toll-free numbers. Each user will have a conference bridge ID that they can use any time they want to set up a conference.

Fax to Email Service

Dedicated phone numbers can be set up for users who receive faxes which can be delivered directly to email.

Robust and Powerful

Our private peering relationships provide multiple routing paths for continuous, uninterrupted transport of your data with fewer hops and low latency, which translates to fewer delays.

Total Solution

LightBound is a full service provider and always includes these additional services at no charge:

- Telco circuit provisioning
- DNS hosting
- SMTP mail spooling
- NNTP news feed
- 24 hr network monitoring
- Bandwidth usage graphs

24 x 7 x 365 Support

LightBound meets the performance and redundancy requirements of the most demanding customers by providing operational support 24 hours a day, 7 days a week, 365 days of the year.

Our trained and experienced technicians are here to help with router configuration, DNS (domain name service) entries, or any other need associated with your Internet service.

Support is available by phone or email and is included with all dedicated Internet access services.
