of solutions for today's
eBusinesses.*

*LightBound's voice and
data solutions help
businesses increase their
productivity and profitability.*

The Value of Corporate Data

Ask any System Administrator. They know all too well that the explosive growth in email volume has overburdened traditional mail systems to the point of collapse. After all email traffic has risen from 100 million messages per day in 1996 to well over 2.1 billion in 2006.

Left with the unenviable task of sustaining such systems, IT staff constantly race between service failure emergencies and ongoing management. Quick fixes are applied to get through the days emergencies, but the problem only seems to get worse.

Redefining Email Reliability

Our dedicated messaging server will ease the administrative burden by completely redefining email reliability and ease of management. With proven uptime of 99.99%, our systems run virtually nonstop, keeping System Administrators out of "fire drill" mode. Valuable IT staff can spend more time focusing on new projects, rather than fighting old fires.

Streamlined Setup

Our turn-key email server solutions take the headache out of email administration. LightBound engineers thoroughly tune the configuration for demanding environments so the initial setup requires minimal time and effort.

Simplified Administration

With an intuitive GUI interface, our commercial email servers have been optimized to simplify ongoing administration, making it simple enough to be mastered by non-technical staff with minimal training.

To further offload administrative tasks, our servers allow end-users to perform common functions such as changing passwords, mail filtering and vacation forwarding.

Virus and Spam Protection You Can Count On

LightBound utilizes Barracuda Spam Firewall® to provide Internet email virus and spam protection unmatched by other solutions.

Barracuda® is a world leader in email protection. They are strongly focused on the corporate marketplace, in contrast Norton, Symantec and McAfee are typically known for their desktop products.
