

# LightBound Data Backup Services

*LightBound provides a comprehensive range of solutions for today's eBusinesses.*

*LightBound's voice and data solutions help businesses increase their productivity and profitability.*

## **Data Backup for the Real World**

LightBound provides proven answers for IT managers who must safeguard their company's priceless data. LightBound utilizes Arkeia Network Backup, a trusted industry solution, for speedy, automated backup and recovery.

Compatible with almost every Operating System that exists, accommodating full and incremental backups, scheduled or on demand, with feature plugins that can handle online backup for databases.

## **Secure**

- Encryption during Transit and On Media
- Two Levels of Data Verification

## **Powerful**

By using Arkeia multiframe/multiplex technologies and client side compression, data backups are capable of backup speeds that often exceed the network's rated speed. Its unique transaction engine allows multiple backups and restores to be performed simultaneously with complete security.

## **Reliable**

Designed to overcome network and system errors by providing trouble-free data backup and seamless data restore. Technical aspects such as point-of-interruption restart from network failover, server-less restore, and catalog backup are just a few of the many features that make your backups safe and reliable.

## **Scalable**

In the event your infrastructure needs to grow, LightBound is ready to follow your lead. We can start from a small server setup and scale to handle multiple servers, open file systems, database backups or disaster recovery of an entire system. Backup starts at 1GB and goes up to 1TB.

## **Affordable**

LightBound's solution using Arkeia's cutting edge technology offers performance and features rival costlier network backup solutions.
