

LightBound Services

*LightBound provides
a comprehensive range
of solutions for today's
eBusinesses.*

*LightBound's voice and
data solutions help
businesses increase their
productivity and profitability.*

Server Colocation

LightBound enables customers to save money and resources by maintaining their own equipment, facility, and local access. LightBound can house business' equipment in our secure, environmentally controlled data center, with direct network connectivity to its diverse Internet backbone. Quite simply, businesses can outsource the responsibility for all of their components to LightBound, while retaining control over the administration of their equipment, content and applications.

Leased Lines

LightBound's leased line service provides a direct connection between businesses' corporate data networks and the Internet. From FT1/T1, DS3, OC-3 to a Gigabit service, our customers receive a full-value Internet connection for the most intense Web applications.

Managed Services

This service offers businesses fully managed Internet service connectivity solutions. Providing convenience, reliability, cost reduction and technical expertise.

E-mail Virus and Spam Control

Systems can be reliably protected with LightBound's Email virus and Spam control utilizing the industry leading Barracuda Spam Firewall®. Whether individuals or businesses have their own Email server or utilize ours, LightBound can provide the protection users need.

VoIP Telephony and Voice Services

Whether your need is traditional TDM PRIs, POTs, or simply want to take advantage of new technologies such as SIP, LightBound has a solution to meet your needs.

Onality trixbox IP (PBX) can add features and functionality you would expect to find in large expensive systems. We offer robust feature rich systems at a price that fits your budget.

Disaster Recovery – Business Continuation Services

LightBound can help businesses develop a business continuity plan. We understand the importance of protecting data and systems. We have the expertise and business associates in other professional fields to help businesses put together a complete business solution. Business leaders will be able to rest easy knowing that should adversity strike, their business will continue to support those who depend on it.

Web Hosting

LightBound's Web hosting services on both Linux and Microsoft Windows platform has a wide range of Web site management features and solutions to help businesses increase performance, enhance reliability and reduce capital costs.

Digital Subscriber Line (DSL)

Home or small business connections can receive enhanced speed and flexibility with DSL on their existing phone line. DSL enables faster transfer of data, graphics, audio and video. And with LightBound DSL, individuals can talk on the telephone while online.

LightBound Services

LightBound provides a comprehensive range of solutions for today’s eBusinesses.

LightBound’s voice and data solutions help businesses increase their productivity and profitability.

Commercial E-mail Server

LightBound’s turn-key e-mail server solutions take the headache out of e-mail administration, offering enhanced reliability and keeping system administrators out of “fire drill” mode.

Managed Firewall with Virtual Private Networks (VPN)

Virtual private networks provide employees with secure, private access to corporate data while traveling. Businesses of all sizes receive the security and performance they need with the most reliable and cost-effective infrastructure available.

Backup and Tape Rotation

Lightbound can provide disk to disk backup for servers at the data center or at your site that has a T1 connection or higher. LightBound can also provide tape rotation making them available for pick up by a contracted off site storage company.

Customized Programs

LightBound offers a complete line of customized programs, including: customer premise equipment (CPE) purchasing/leasing options, telco circuit provisioning, domain registration, domain name service (DNS) support, simple mail transport protocol (SMTP) services, Usenet feeds, and 24/7 network monitoring and support.

Server Virtualization and Shared Storage

LightBound plans to offer a virtualized server platform utilizing VM Ware along with Compellent SAN. Available first quarter 2010.
