You Manage Your Business: Let Us Manage the Rest

The cost of hiring qualified engineering and technical expertise is growing. Retaining quality people is even more difficult. This is why many companies are outsourcing the administration and management of their critical systems to LightBound.

Don't be left behind, let us work with your company to help build, manage and grow your business on the World Wide Web.

Set Your Business Apart

LightBound Managed Solutions are individually tailored to each client with their specific needs and budget in mind.

We understand that configuring and managing application servers along with a wide area network is probably not the business you're in, so leave it to us to take care of the circuit provisioning, installation, configuration and server infrastructure setup.

Our Managed Services are perfect for companies that need guaranteed system uptime and security. No capital investment is needed. LightBound will provide, own and manage the equipment. Building the future for a long term business relationship.

Wide area network and server infrastructure can be monitored 24x7, and restored 8x5 NBD or 24 restoration depending on customer needs.

Easy to Use Services

LightBound will recommend, procure, configure, protect, and manage your server-network. We take the burden of keeping your uptime operating at peak efficiency and insure your is security up to date.

We have the technical expertise to managed your needs whether a single router, firewall or tying all of your remote offices back to one location. We select equipment to meet your budget while allowing its configuration to easily expand as you grow.

Service, Support and Security

Providing quality service is very important to us. LightBound can manage:

- Firewall
- DNS Configuration
- Full Service Monitoring
- Virus and Spam Services
- Mail Services
- Router and WAN connectivity
- Internet Services
- Application mail, web servers
- IP Phone systems
